OBJECTIVE

Motivated and detail-oriented software engineer with a solid background in software development. Enjoys solving problems, thinking creatively, and learning new technologies quickly. Looking for opportunities to apply technical skills, contribute to a team, and grow in a dynamic software development environment.

PROFESSIONAL EXPERIENCE

Softvence IT Ltd. — Laravel Developer *August 2025 – April 2026*

Worked as a Laravel Backend Developer, developing and maintaining backend systems for web and mobile applications using PHP and Laravel. Designed and implemented RESTful APIs, developed admin panels for managing application data and system operations, and implemented role-based authentication and authorization for different user roles. Worked on database design, relationships, queries, and backend business logic, while integrating frontend applications with backend APIs and handling data validation and request processing. Also debugged, optimized, and maintained backend features to ensure reliable application performance.

EDUCATION

Noakhali Science and Technology University *March 2022 – September 2026*
Bachelor of Science in Software Engineering CGPA: 3.48/4.00

Adhyapak Abdul Majid College, Cumilla *July 2018 – May 2020*
HSC in Science GPA: 5.00

Dulalpur C.M High School *January 2013 – March 2018*
SSC in Science GPA: 5.00

SKILLS

Programming Languages: C, C++, Java, Python
Frontend: HTML, CSS, JavaScript
Backend: Django, PHP, Laravel
Database: MySQL
Data Analysis: NumPy, Pandas, Matplotlib, Seaborn
Version Control: Git, GitHub
Tools: XAMPP, VS Code, IntelliJ, Anaconda, PyCharm
Software Development Principles: Architecture, Design Patterns, SOLID Principle

ONLINE JUDGES

Engaged in competitive programming with 600+ problems solved across multiple online judge platforms.

- **Codeforces:** Max Rating – 1211 (Pupil), 400+ problems solved
- **CodeChef:** Max Rating – 1458, 160+ problems solved
- **Beecrowd:** 56+ problems solved

PROJECTS

AgroWave *May 2024 – November 2024*

- AgroWave enables farmers to make better decisions with crop and fertilizer predictions, weather updates, and tool hiring. It also connects farmers and buyers through a digital marketplace for selling and purchasing crops.
- **Tech Stack:** Python, PHP, HTML, CSS, JavaScript

EventHub *April 2025 – May 2025*

- EventHub streamlines event planning by allowing organizers to create, edit, and showcase events with full details and live Google Maps integration. It includes an admin panel to manage users, posts, and moderate content in real time.
- **Tech Stack:** Laravel, HTML, CSS

Dungeon Crawler *March 2023 – September 2023*

- A real-time dungeon crawler game where a single hero navigates and battles multiple enemies using strategic combat to survive. The game ends if the hero is defeated, creating an engaging and challenging experience.
- **Tech Stack:** Java

Human Disease Prediction *October 2024 – November 2024*

- A web-based predictive system that analyzes user-provided symptoms along with historical disease data to forecast possible diseases. It provides disease predictions, descriptions, and precautionary measures to support early awareness and prevention.
- **Tech Stack:** Django, HTML, CSS
- **ML Algorithms:** Decision Tree, Random Forest, Naive Bayes, K-Nearest Neighbor

PARTICIPATION AND ACHIEVEMENT

- 4th place in the "Intra NSTU Programming Contest-2023, CSTE"
- Participated in "Intra NSTU Programming Contest-2023," organized by Science Club, NSTU
- 9th place in the "Intra NSTU Programming Contest-2022, CSTE"

CERTIFICATIONS

- Web Development with PHP-Laravel by EDGE IIT NSTU
- Blockchain Development Course by Ostad Platform

EXTRA-CURRICULAR ACTIVITIES

- Co-Founder at Naladakshin Student Society

- Member of IT Club, NSTU
